Porta Vita

5 benefits of "Porta Vita"

1. Quality:

"Porta Vita" products are made of solid one-piece hardwood.

The wood for the manufacturing of "Porta Vita" solid floor is thoroughly selected.

The main determining factor is the natural beauty and high quality of the products.

With further processing of wood, its nobility and individual qualities of grade are emphasized. A bevel on a perimeter of a wood creates an additional figure. Having gone through complete production cycle, it is being ground and covered with high-end oil Osmo (Germany) followed by manual finishing of the products.

"Porta Vita" products are produced with modern high precision imported equipment that allows to achieve stability, the accurate geometry and the optimum moisture content ($8 \pm 2\%$).

2. Ecological compatibility:

Wood for "Porta Vita" solid wood manufacturing grows in ecologically clean regions of Ukraine, which is confirmed by the hygienic and radiological certificates.

Osmo oil (Germany), which is used in the manufacturing, is produced on a base of natural oils and waxes. Natural oils and waxes penetrate deeply into the wood. They keep the wood healthy and supple and prevent its drying out. Wood retains its ability to breathe. Moisture evaporates. The risk of swelling and shrinkage of wood is reduced.

Oil contains no biocides or preservatives. The dried oil is safe for humans, animals and plants. It corresponds to the European standard EN 71.

Osmo colorants have been certified under the standard DIN EN ISO 9001 for a quality management system and DIN EN ISO 14001 standard for the environmental management system.

3. Individuality:

Products "Porta Vita" — the best choice for those who prefer individuality and naturalness. Solid wood creates a feeling of comfort and doesn't lose the value with the course of time.

Solid wood floors are emphasize the richness and sophistication of the interior, allow (depending on the grade and the selected range of colors) specify the style and atmosphere of the whole premises. Color brings dynamics to our lives, helps to make the necessary emphasis and gives meaning to the elements of the interior.

Our company provides an individual approach, which gives the opportunity to choose products by:

a) grades: oak, ash, maple, cherry, walnut;

b) grade: antique, rustic, elegance, exclusive;

c) surface finishing: smooth, structured brush, wavy planing, artificial aging;

d) range of colors;

e) size: to choose from:

- width from 100 to 200 mm

- length from 500 to 2400 mm

- thickness from 16 to 22 mm.

4. Exclusivity:

"Porta Vita" products — is something else in the house. Solid wood floor — not just an element of decor — it is a demonstration of your taste and uncompromising approach to quality of life, the desire to surround yourself with the true values.

Wood is like no other building material, offers a huge variety of finishing and unlimited opportunities for individual creativity.

Whether you prefer an elegant classic or modern design — an elegant wood grain and soft natural tones will make your house presentable and comfortable.

5. Practicality:

"Porta Vita" solid wood: a surface, finished with oil and hard wax is easy to care for and defines by a particular strength and durability. Waterproof and dirt-repellant. A surface, finished with oil and hard wax is resistant to wine, beer, Cola, coffee, tea, juice, milk, water, etc. in accordance with DIN 68861-1C standards. Spots can be removed easily and without a trace. For the restoration of some sections, prone to heavy load or damaged surfaces, it is enough to clean the surface and apply a new layer of oil. It does not appear visible places of oil layers overlay of on each other. It does not need sanding and painting the entire surface.

Grade of quality description of oak solid wood

Grade of quality description of **OAK** solid wood

Elegance

Mixed cutting, changes in tone between the dies are more pronounced, natural and spackled knot with a diameter up to 9 mm, depending on the width of the wood. The number of knots on a plank is not regulated. Sapwood and cracks on the front side are not allowed.

Rustical

Mixed cutting, changes in color, knots with a diameter up to 27 mm, spackled cracks of knots and surface cracks up to 20 mm. Sapwood on the front side is not allowed.

Antique

Mixed cutting, sharp changes in color, spackled knots of tobacco shades, the size and number of knots is not regulated, spackled cracks of knots and surface cracks. Sapwood on the front side is not allowed.

Note:

Solid wood is a natural product. Changes in color, structure, and the presence/absence of typical wood characteristics, such as cracks, knots, etc., can be expressed more or less — depending on the quality and grade of wood.

The company carries out strict monitoring of possible deviations in grade, however not always it is possible to eliminate them completely. Therefore, the presence of such abnormalities in less than 5% of the quantity ordered should not be the ground for complaint.

Standard 4-side bevel with the size of 2.5 mm.

Humidity of a solid wood 8 +/- 2%.

Maximum deviation from the linear dimensions is 0.5 mm.

Grade of quality description of **ASH** solid wood

Elegance

Mixed cutting, changes in tone between the dies are more pronounced: from white to cream-colored, natural knot with a diameter up to 3 mm, depending on the width of the wood. The number of knots on a plank is not regulated. The dark part of the heartwood is not allowed.

Multicolored
